**TOTAL WASTE
MANAGEMENT THAT
DOESN'T COST THE EARTH**

WHY US?

SUSTAINABLE WASTE MANAGEMENT THROUGH OUR CARBON NEUTRAL SERVICE

Established in 1999, B&M Waste Services achieves service excellence by providing environmentally friendly waste minimisation, reuse and recycling options that work.

Our experience and partnership approach helps you to achieve your business sustainability goals, by delivering what we promise, within budget in the most environmentally friendly way.

We've been Carbon Neutral across the business since 2011 and assessed to PAS 402:2013 standards which looks at disposal and recovery rates and monitors our waste re-use, recycling and zero waste to landfill aim. In 2021, we were awarded Carbon Neutral Plus status.

SOLUTIONS

1

Single supplier, one bill, one account manager, one solution

2

Individually tailored solutions using latest technology to suit each site's waste streams and needs

3

Full training to ensure maximum waste reduction and recycling with minimum disruption, always sustainability focused

INNOVATION

LATEST TECHNOLOGICAL SOLUTIONS

Our innovative solutions reduce waste volume, increase recycling and reduce collection frequency - this therefore reduces the carbon impact of your waste. Our suite of solutions are continually evolving as technology develops, meaning that we can now offer electric vehicles, waste monitoring and food waste minimisation stations, baling and compaction options, as well as reverse vending machines. All options are tailored to your budget and full training is provided, as health and safety is paramount.

B&M Waste Monitor

B&M Food Waste Station

Reverse Vending Machine

Twin Chamber Baler

Mini Baler

Compactor

TOTAL WASTE MANAGEMENT

Our Total Waste Management team deliver solutions designed specifically to reduce the cost and minimise the environmental impact of your business waste through dedicated account management and innovative recycling technologies.

Our state of the art Innovation Centre allows customers to 'try before they buy', and fully understand all equipment options and their benefits, whilst seeing them live in action.

We can help to improve the waste management performance of the most complex and multifaceted sites and deal with complicated issues including commercial & industrial, hazardous & offensive wastes, segregated recyclable commodities and confidential materials.

TELEMETRY

We know the road to reducing, reusing and recycling isn't easy but by utilising telemetry we ensure we plan collections when you need them, reducing unnecessary site visits, improving health and safety and reducing both the cost and carbon impact of your waste.

From equipment, to computer, to collection, the whole process is simplified. Whatever your business sector, budget, environmental desires, or space available, we can provide a tailored solution.

WASTE MINIMISATION

SOLUTIONS FOR YOU

Following a detailed site audit, your dedicated account manager will develop a waste minimisation, reuse and recycling strategy that suits your budget, space and environmental requirements. Ongoing, we will work with you to continue a waste management programme that adapts to changing business, legislative and environmental factors.

Simple Swaps

Simple Swaps are small (and simple!) changes that can be made both in the workplace and at home.

The production and distribution of plastic has a huge carbon footprint, which is heightened by the sale of plastic products which are marketed as disposable but are destined for landfill after a single use.

Our programme could make a significant difference to your waste reduction to address where you could make the changes needed to reduce your waste output. Not only will this improve your environmental impact, it could also save you money through re-using products and reducing the amount of bin collections that you need.

Paper Cup Recycling

B&M Waste's Paper Coffee Cup recycling scheme aims to encourage recycling of paper coffee cups through the re-use of the delivery box your coffee cups arrived in. Simply empty and flatten the coffee cups – no liquids, sleeves, lids or stirrers please. You can then pack the cups into the box, call us for collection and we'll do the rest – ensuring all your coffee cups are 100% recycled.

B&M Haz Box

Especially suited to the office environment, the B&M Haz Box can be filled with batteries, bulbs, glues, bathroom cleaners, paint, ink containers and other small hazardous items, which shouldn't go in your general waste bin. The B&M Haz Box provides assurance of environmental compliance and we organise and provide all necessary paperwork.

CONTAINER OPTIONS

We encourage segregation of waste into separate bins for each waste stream to minimise contamination of waste and maximise recycling. Clear signage explaining which waste goes into which container helps to achieve this.

Capacity	Dimensions (m)	Waste Types
 60 litre internal bins	H: 0.63 W: 0.51 D: 0.28	general waste dry mixed recycling single waste stream recycling including: paper, card & plastic
 240 litre wheeled bin	H: 1.10 W: 0.58 D: 0.74	general waste dry mixed recycling single waste stream recycling including: paper, card, plastic, food & glass
 360 litre wheeled bin	H: 1.10 W: 0.60 D: 0.87	general waste dry mixed recycling single waste stream recycling including: paper, card & plastic
 660 litre wheeled bin	H: 1.24 W: 1.22 D: 0.77	general waste dry mixed recycling single waste stream recycling including: paper, card & plastic
 1100 litre wheeled bin	H: 1.35 W: 1.25 D: 1.06	general waste dry mixed recycling single waste stream recycling including: paper, card & plastic

HIGHLY ACCREDITED

SECURE SHREDDING

Helping you remain GDPR compliant, B&M Secure Shredding is accredited to BS 15713 and ISO 9001 standards, as well as being Carbon Neutral Plus accredited.

Using our service provides peace of mind and a full audit trail, including a certificate of destruction for all your paperwork, media, uniforms and branded goods.

CASE STUDIES

DON'T JUST TAKE OUR WORD FOR IT

"The new waste management system has been an instant success. The site is much tidier and it has been great to generate revenue from some of our waste streams. Not only is the system much more efficient but we have increased our recycling rates and greatly reduced our carbon emissions."

Gretna Gateway Outlet Village, Gretna Green

ACCREDITED BY THE UNIVERSITY OF BIRMINGHAM

"The partnership we're going to have with B&M Waste moving forwards is all the things we've been looking for, for quite a while. We are currently trying to attain eco-campus status, and by working with B&M we will achieve this in a very short time I'm sure."

University College Birmingham

"Following the administrative task of cancelling four contracts, mobilisation with B&M Waste Services was smooth and the service has been great since things got up and running."

MK2 Real Estate

"Since working with B&M Waste the bins are emptied at a time to suit ourselves, nothing is too much trouble for the drivers, they do a great job. We are thrilled with our current diversion from landfill levels and look forward to the future and improving recycling further. While working with B&M Waste we are confident we can achieve this goal."

ITV Studios, Leeds

"What's been great about working with B&M Waste has been the tailored support that they've offered to us as a museum. It's been a real partnership where we've worked together for the past year to tailor a system that we think will work best for us. We're even looking into other areas – such as how we can support them with their educational aims."

Science and Industry Museum, Manchester

EDUCATION

Our Little Litter Pickers Programme was designed to educate future generations about the wider impact waste has on the environment. Covering KS1 to KS5, we have designed a range of educational, fun-filled and interactive days that can be tailored to each school's individual needs.

Step 1: Register Online

Step 2: Receive your welcome pack, which includes a pre-visit lesson and litter pick

Step 3: Visit us! We have the option of either a half or full day experience

Step 4: Receive your follow up resources and continue on your waste minimisation journey

Our Education Programme Leader has many years of experience and is a fully qualified teacher. Her passion for education and environmental protection shines through in her visits.
