B&M
Waste Management

WHY US?

SUSTAINABLE WASTE MANAGEMENT THROUGH OUR CARBON NEUTRAL SERVICE

Established in 1999, B&M Waste Services achieve service excellence by providing waste minimisation, reuse and recycling solutions that actually work.

Partner with us and achieve your business sustainability goals, by delivering what we promise, within budget and with a view to minimise your environmental impact.

We've been Carbon Neutral across the business since 2011 and assessed to PAS 402:2013 standards which look at disposal and recovery rates, monitoring our waste re-use, recycling and zero waste to landfill aim.

SOLUTIONS

1

Single supplier, one bill, one account manager, one solution

2

Individually tailored solutions using latest technology to suit each site's waste streams and needs

3

Full training to ensure maximum waste reduction and recycling with minimum disruption, always sustainability focused

INNOVATION

LATEST TECHNOLOGICAL SOLUTIONS

Our innovative solutions reduce waste volume, increase recycling and reduce collection frequency- this therefore reduces the carbon impact of your waste. Our suite of solutions are continually evolving as technology develops, meaning that we can now offer electric vehicles, waste monitoring and food waste minimisation stations, baling and compaction options, as well as reverse vending machines. All are tailored to your budget and full training is provided, as health and safety is paramount.

TECHNOLOGY

TELEMETRY

We know the road to reducing, reusing and recycling isn't easy, by utilising telemetry we ensure we plan collections when you need them, reducing unnecessary site visits, improving health and safety and reducing both cost and carbon impact of your waste strategy.

Waste compactors located on your site can be fitted with technology which allows notifications to be generated and sent to a main computer when the waste has filled it to a predefined level, usually 75% full.

This allows collection vehicle visits to be planned in a timely manner, as opposed to ongoing collections which may result in vehicles on the road when they don't need to be and collections of half full compactor boxes. This not only reduces the carbon emissions but also ensures fairer waste charges, as collections are when required.

From equipment, to computer, to collection, the whole process is simplified.

Whatever your business sector, budget, environmental desires, or space available, we can provide a tailored solution.

TOTAL WASTE MANAGEMENT

We know it's easier when there's one bill, one account manager and one point of contact, which is why our total waste management solution offers a one stop shop for all of your waste. Whatever the bespoke solution; equipment, multiple services or waste operatives on-site, our expert team will be at your side from mobilisation and ongoing.

Our state of the art Innovation Centre allows customers to 'try before they buy' and fully understand all equipment options and their benefits while seeing them live in action.

Our Total Waste Management team deliver solutions designed specifically to reduce costs and minimise environmental impact, through dedicated account management and innovative recycling technologies.

We can help to improve the waste management performance of the most complex and multifaceted sites and deal with complicated issues including commercial & industrial, hazardous & offensive wastes, segregated recyclable commodities and confidential materials.

Helping you remain GDPR compliant, B&M Secure Shredding is accredited to BS 15713 and ISO 9001 standards, as well as being Carbon Neutral. Using our service provides peace of mind and a full audit trail, including a certificate of destruction for all your paperwork, media and branded goods.

WASTE MINIMISATION

SIMPLE SWAPS AND PAPER CUPS

Simple Swaps are small (and simple!) changes that can be made both in the workplace and at home. The production and distribution of plastic has a huge carbon footprint, which is heightened by the sale of plastic products marketed as disposable, but are destined for landfill after a single use.

Our programme could make a significant difference to your waste reduction, to address where you could make the changes needed to reduce your waste output, not only will this improve your environmental impact, it could also save you money through re-using products and reducing the amount of bin collections that you need.

B&M Waste's Paper Coffee Cup recycling scheme aims to encourage recycling of paper coffee cups through the re-use of the delivery box your coffee cups arrived in.

Simply empty and flatten the coffee cups – no liquids, sleeves, lids or stirrers please. You can then pack the cups into the box, call us for collection and we'll do the rest – ensuring all your coffee cups are 100% recycled

MANAGEMENT INFORMATION

WE MAKE REPORTING EASY

Our reports demonstrate to you the quantity of each waste stream produced at each of your sites, as well as the recycling or recovery process used to process your waste. We also measure our performance against agreed KPIs, to report the excellent quality of service you receive.

We know that providing you with quality data in a timely and efficient manner allows you to gain a full and transparent understanding of the service we provide, which is why we offer you an online portal to log into and obtain your reports.

Environmental Report

Customer Group: GROUP ABC

Date: 01/03/2019 to 31/03/2019

TOTAL DIVERSION FROM LANDFILL : 100 %

What happened to your waste?

Of your recycled waste, below shows the materials

Welcome to your environmental report which shows you the breakdown of your waste by type, and what has happened to it once it has been collected. You'll notice the amount of waste which has been diverted from landfill. You'll see the proportion of waste which has been recycled, as well as waste sent for energy recovery at either an Anaerobic Digestion facility (AD, for food waste) or a waste-to-energy facility (Refuse Derived Fuel or RDF from non-recyclable general waste). We'll also show you the breakdown of recycled materials by the type of material. And you'll see how the equivalent energy generated through AD and RDF could be used. You'll see your data across the last 12 months on page 2 and following this, a breakdown of your waste by each individual site.

Total Collected Waste (KG)

Material	Weight	Recycled	RDF	AD	Landfill
General Waste	1,950.00	1,950.00	0.00	0.00	0.00
Mixed Glass	26,893.08	26,893.08	0.00	0.00	0.00
Mixed Municipal Waste	10,708.50	3,212.55	7,495.95	0.00	0.00
Organic Food Waste	3,690.00	0.00	0.00	3,690.00	0.00
Paper & Cardboard	605.00	605.00	0.00	0.00	0.00
Total	43,846.58	32,660.63	7,495.95	3,690.00	0.00
		74.49%	17.10%	8.42%	0.00%

How your RDF and AD equates to energy

RDF kWh/Tonne - each tonne of RDF produces the below kWh (1)	RDF Weight (KG)	AD kWh/Tonne - each tonne of AD produces the below kWh (2)	AD Weight (KG)	Total kWh Produced	No of TVs powered for a year (3)	Washing Machine Cycles Complete (4)	No of Fridge Freezers powered for a year (5)	No of Office Printers powered for 1 week: typical printing cycle (6)	Miles driven in a family electric car (7)
575	7,496	300	3,690	5,417	85	4,925	30	1,129	22,752

MOBILISATION AND TRAINING

The key to successful commencement of service is to involve all relevant stakeholders early in the planning phase and ensure communication at every stage. As Customer Focused Business of the Year, we appreciate this and work in partnership with customers to ensure both set up and ongoing contract support is provided.

Through our experience of mobilising large multi-site contracts, the process is mapped using our Integrated Waste Management system. Updated reports and Gantt charts are produced and circulated to all concerned.

Health & Safety is paramount, so full risk assessments are conducted and training delivered on-site by qualified staff, to ensure safe use of all equipment, and buy-in to new or improved waste strategies to ensure success of the programme.

B&M Waste Services Mobilisation Plan

CASE STUDIES

DON'T JUST TAKE OUR WORD FOR IT

"The new waste management system has been an instant success. The site is much tidier and it has been great to generate revenue from some of our waste streams. Not only is the system much more efficient but we have increased our recycling rates and greatly reduced our carbon emissions."

Gretna Gateway Outlet Village, Gretna Green

"The partnership we're going to have with B&M Waste moving forwards is all the things we've been looking for, for quite a while. We are currently trying to attain eco-campus status, and by working with B&M we will achieve this in a very short time I'm sure."

University College Birmingham

"Following the administrative task of cancelling four contracts, mobilisation with B&M Waste Services was smooth and the service has been great since things got up and running."

MK2 Real Estate

"Since working with B&M Waste the bins are emptied at a time to suit ourselves, nothing is too much trouble for the drivers, they do a great job. We look forward to continuing our work with them, we are thrilled with our current diversion from landfill levels and look forward to the future and improving recycling further. While working with B&M Waste we are confident we can achieve this goal."

ITV Studios, Leeds

"What's been great about working with B&M Waste has been the tailored support that they've offered to us as a museum. It's been a real partnership where we've worked together for the past year to tailor a system that we think will work best for us. We're even looking into other areas – such as how we can support them with their educational aims."

Science and Industry Museum, Manchester

HIGHLY ACCREDITED

EDUCATION

Our Little Litter Pickers Programme was designed to educate future generations about the wider impact waste has on the environment. Covering KS1 to KS5, we have designed a range of educational, fun-filled and interactive days that can be tailored to each school's individual needs.

Step 1: Register Online

Step 2: Receive your welcome pack, which includes a pre-visit lesson and litter pick

Step 3: Visit us! We have the option of either a half or full day experience

Step 4: Receive your follow up resources and continue on your waste minimisation journey

Our Education Programme Leader, Maria Williams, has years of experience- previously working as a geography teacher in a local high school. Coupled with a BSc in Environmental Science and a passion for education and environmental protection.
