Management Solutions**

**B&M WASTE NEW PRODUCT LAUNCH**

# **Customer Safeguarding During the Covid-19 Health Crisis**

# Customer safeguarding During the Covid-19 Health Crisis

Since the development of the Coronavirus outbreak, B&M Waste have been working diligently to mitigate the risk to our employees, customers, and the public, while continuing to provide an uninterrupted service.

Our workforce are all provided with the relevant PPE, and are complying with social distancing measures so that they can continue to undertake their work safely and to a high standard. During this time we have strived to continue operating whilst keeping you free from harm. As a business, we have tried to mitigate every risk/scenario as reasonably foreseeable and will continue to do so as lockdown is eased.

## Welcoming Our Customers Back to Work

We look forward to welcoming our customers back to work, and as we anticipate more and more businesses returning, we want to inform our customers that we are adapting our approach and contingency plans to align with government 'COVID-19 secure' guidance.

## During this time we will:

- Create and maintain relationships with UK suppliers and local businesses
- Introduce new processes, products and services to ensure maximum safety
- Continue to communicate openly contacting our customers with regular updates
- Update and adapt our internal Business Continuity Plans

## New Product Launch For Enhanced Hygiene

Disposing of waste safely and compliantly is a key safeguarding concern for many businesses during this crisis. We recognise the need for specific solutions and/or containers for waste and recycling that minimise contact and reduce the risk of spreading COVID-19. A compliant solution to dispose of used masks and PPE is now an absolute necessity.

We want to instill the utmost confidence in our customers that we are here to support you in order to make the

transition returning to work as stress free as possible. We have measures in place to ensure maximum safety including the sale of a number of new products and services.

## The ONLY COVID-19 solution for Waste and Recycling

If you would like to discuss these new products and services with us, or if you are worried or confused about what to do with your waste; contact our helpful Customer Relations Team on 0330 1234 100 or email [info@bandmwaste.com](mailto:info@bandmwaste.com).

# Product Catalogue

The following products are now available from B&M Waste to encourage safe hygiene practices.

## Contactless Pedal Bins To Safely Dispose of your PPE Waste

The PPE bin is provided with a service agreement, which is tailored to meet the footfall needs of the site. The 65L unit will be left on site and the bag serviced as a liner. Each bin will be provided with a tiger bag to dispose of medical items that do not carry any risk of infection.

The PPE bin is pedal operated, removing the need for hand contact and reducing the risk of cross infection. They are also treated with ENVIROSAN® Active, a safe and effective germicide which incorporates a natural enzyme to combat harmful bacteria. This reduces bacteria levels by 99.99%, is certified against HIV, Hepatitis B and Hepatitis C, and is the only germicide to conform to BS1276 and BS13727.

**Size: 54.1cm x 60.3cm x 35.9cm**

**Capacity: 65 litres**

**Construction: Polypropylene**

## Swabs and dressing disposal

The swabs and dressings disposal container has been specifically designed for the safe disposal of both clinical and hazardous swabs and dressings waste from a range of environments.

We offer 'contactless' pedal operated bins to protect your employees from viruses and bacteria. Pedal engineered for easy and safe disposal of potentially harmful waste.

**Size: 34cm x 56.5cm x 43cm**

**Capacity: 45 litres**

**Construction: Polypropylene**

## Clinical and Offensive Waste Collection

**Infectious Clinical Waste and Non Infectious Offensive Waste Collections.**

**Minimum frequency fortnightly, 770L and 1000Ltr only**

Hazardous waste poses significant risk to harm human health and, or the environment. Clinical waste should be expertly managed and PHE guidelines should be followed when managing hazardous or potentially contaminated waste. We offer hygienic and efficient disposal of hazardous waste so that facilities can operate safely.

## Floor Standing Hand Sanitisers

### No Touch Motion Activated Hand Sanitiser

#### No cross contamination - Ideal to Keep Workplaces Hygienic and Safe

We're offering no touch hand sanitiser stands, including the one litre Auto Foam NO-GERMS hand sanitiser dispenser. The station encourages effective hand hygiene and is great for high footfall areas or wherever crowds gather. The stand is 12kg, meaning it remains stable and with an automatic dispenser, there is no need to touch the unit during use. One Litre provides 4000 uses.

#### Product Benefits

- Modern automatic hand sanitiser and stand helps to create a more hygienic environment
- The stand display area will include clear instructions about use and hygiene benefits
- The dispenser is securely locked to avoid any mess, bulk fill container inside the unit is topped up at each service
- Hygienic, automatic hand detection and integrated drip-tray to prevent overspill
- No electrical installation, the hand sanitising station runs on [batteries](#)
