

Portable Compactor

Maximise space.
Reduce carbon footprint.
Lower costs.

The B&M Portable Compactor is ideal for general and food waste where environmental and hygiene requirements demand a sealed unit or where space is at a premium. The equipment is available in a range of colours and comes with Health and Safety stickers as standard.

Key Benefits:

- Pre-full and full warning lights, guaranteeing maximum container payloads.
- On-board telemetry system to email/text alerts to up to 4 users.
- Leak-resistant seals, fast cycle times and high volume charge boxes mean reduced waste costs
- Safe and easy to operate
- Backed by a network of engineers to ensure maximum reliability
- Reduced transport costs and therefore reduced carbon impact
- Self-contained unit ensures zero waste loss, ensuring optimum hygiene
- Customer specific branding available

Key Components:

- Can be tailored to customer needs, including remote control station via cable and plug, lockable vandalproof covers and remote control stations
- Full safety interlocks
- Cleanline and conical container design for easy emptying
- Multi-cycle timer
- Various loading options including manual, integrate bin tipper and automatic lid opening
- Drainage valve to drain excess fluid
- Rear positioned hook lift (for dock loading applications) is available
- Power supply: 32amp 3 phase, Neutral + Earth (TPN+E)
- Machinery size: 7.5m x 2.5m x 2.3m height
- Operational footprint: 3.5m x 9m (+ 10m for collection)
