

# MILL SIZED BALER

Save time · Maximise efficiency · Minimise costs

The B&M Mill Sized Baler performs a vital waste management role with the major environmental benefit of saving waste from landfill. Baled recyclable material can also provide businesses with an invaluable waste stream by producing industry standard mill size bales.

Suitable for: Large-scale recycling operations, retail outlets, manufacturers, distribution and logistics centres, healthcare, property and facilities management

## Key Benefits:

- Produces a mill size bales
- Bales produced are easy to handle and stack
- Sort waste at source so no cross-contamination occurs
- Increases recycling and reduces frequency of collections of waste, therefore reducing waste collection costs
- Bales produced can be directly internationally traded without further processing, maximises rebate return

## Key Components:

- Semi-automatic hydraulic bale discharge
- Two-hand control for safe bale ejection
- Visual bale full indicator
- Automatically opening loading door
- User-friendly push button controls
- Automatic cycle saving labour time
- Robust construction for long life
- IP55-rated for outdoor use

## Specifications:

- Power supply: 32 amp 3 Phase (3PN+E)
- Machinery size: 1.75m x 1.2m x 3.55m height
- Operational footprint: 2.5m x 3.5m
