

MINI CHAMBER BALER

Save time · Maximise efficiency · Minimise costs

The B&M Mini Baler is our entry level machine. It's compact design makes this machine ideal for locations where space is at a minimum.

Suitable for: Garage forecourts, retail outlets, offices, pubs, restaurants and fast food outlets, property and facilities management.

Key Benefits:

- Makes a dense bale of up to 60kg, which can be easily ejected with a trolley
- Simple to install and use
- Produces a bale that can be manually handled and is easy to store
- Easy loading
- Takes up minimal space
- Press ram can stop in down position, which is ideal for materials with memory such as LDPE plastics
- Increases recycling and reduces frequency of collections of waste, therefore reducing waste collection costs

Key Components:

- Bale ready light
- Bale ejecting trolley
- Bales tied with plastic banding
- Automatic cycle

Specifications:

- 16 amp single phase power supply
- Machinery size: 1.1m x 1.6m (with door open) x 2m height
- Operational footprint: 2m x 2.5m
